Chapter 4 Reproductive Health

* Reproductive health means a total well-being in all aspects of reproduction i.e physical, mental, emotional and social aspects.

This term also refers to healthy reproductive organs with normal functions.

Reproductive health in India

1. India was amongst the first countries in the world to initiate action plans at a national level to attain total reproductive health as a social goal.
2. These 'family planning' programmes were initiated in 1951. Improved programmes are currently in operation under the popular name 'Reproductive and child Health care' (RCH) programmes.

Crucial concerns of reproductive health

Some crucial concerns of reproductive health are:

1. Complication in pregnancy
 2. Childbirth
 3. Unsafe abortion
 4. Lack of awareness
 5. Myths and misconceptions
 6. Sexually transmitted diseases (STDs)
- For girls, secondary school enrollments are very low in
